

Connolly® 2.0

LOUNGE COLLECTION

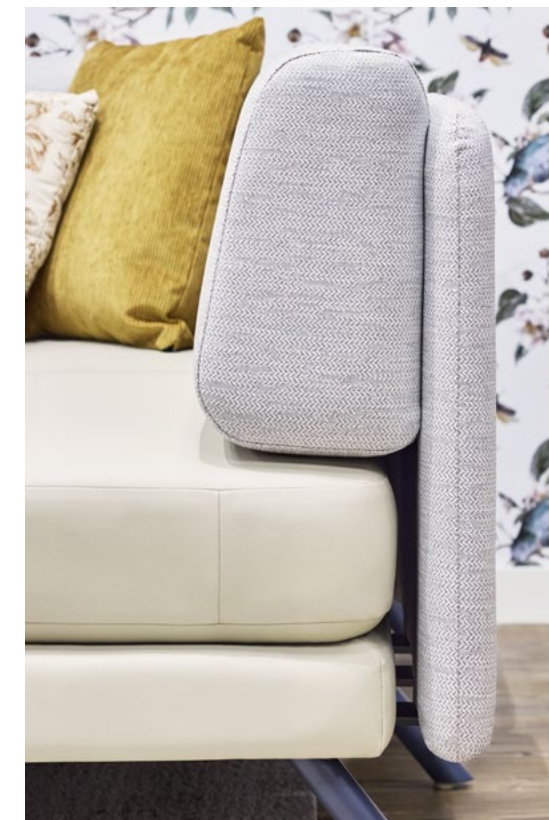

NATIONAL.

Ideal for spaces that demand style and functionality.

Connolly 2.0 was specifically created to accommodate today's high-use applications in workplace, education, and health environments. Designed with a higher sit than original Connolly and an optional oversized arm cap with a finger pull overhang, Connolly 2.0 makes it easier for guests to sit in and exit the chair. Additional elements like a push-through clean out channel for detailed sanitation and a metal wall saver leg option to eliminate wall marring, make Connolly 2.0 an ideal solution for spaces focused on user comfort, cleanability, facility maintenance, and aesthetics.

Beauty, durability, and comfort combine for high performance.

Designed for high-use and extreme sanitation situations, Connolly 2.0 is an ideal solution that flows from lobby or welcoming areas to patient, administrative, and student spaces. An optional moisture barrier can be added to the seat cushion, seat deck, back, and arms to aid in the cleanability and longevity of the furniture. In addition, by not including the optional upholstered accent panel on the arms and extreme back, stitching holes are decreased, providing less opportunity for bacterial infiltration.
